

Introduction to Wiese Europe

Wiese Europe is an internationally renowned engineering & manufacturing company with a broad experience in servicing and supplying loading and safety applications to both the chemical as well as petrochemical industries.

The company started out in 1988 as a family business with the repair, maintenance and sales of loading arms manufactured by the German company Wiese GmbH, in its own workshop of just 300m².

Up until Wiese GmbH was discontinued, a prosperous cooperation existed between both companies. Based on a mutual decision, Wiese Belgium started manufacturing loading arms for their home market in Belgium with the support of the former owner of Wiese GmbH. Wiese GmbH was succeeded by a new company, however being the sole inheritor of the Wiese name, the ways of Wiese Belgium and the subsequent company soon split.

Wiese Belgium evolved from a local player in the Benelux countries to a European reference serving the international market. This resulted in a name change to Wiese Europe, meant to display its ambition to remain a preferred partner.

Until today, Wiese Europe can still fall back on the extensive experience and knowledge it has acquired from the former Wiese GmbH and Connex GmbH, allowing us to service also those arms as if they were our own.

The Wiese Europe production plant in Belgium has been constructed according to the needs of our customers demanding high technology loading arms and safety systems. Still today all engineering, manufacturing and assembly is possible in our own workshop providing close monitoring of manufacturing, quality control and testing. With recent expansion, the plant covers 4000m² of engineering, production and office space under one roof.

Nowadays the goal of Wiese Europe is to be close to every end-user by means of sales and service partners worldwide carrying out its values and principles of high quality and rapid response.
