

TP – Top loading arm

The TP loading arm is the basic model for top loading of trucks and trains who still require a little flexibility. It serves a small to medium operating range and can be fitted with several accessories.

Features:

- Sizes DN50-DN80 (2"-3")
- Pressure range: 40 bar
- Temperature range: -196°C to +250°C
- Balancing by spring cylinder
- Material: available in carbon steel, stainless steel, low temperature carbon steel or special alloys

Options:

- PTFE lining
- Jacket heating, electric tracing, insulation
- Suction hood
- Overfill protection
- Other sizes on request
