

## 3-2STi Swivel Joint – internal heated

General description:

The model 3-2STi is based on the 3-2ST swivel joint. This swivel joint has internal heating to ensure no cold bridges are formed inside the loading arms. The swivel joint is frequently used for applications such as sulphur and asphalt loading.

Features:

- Available in carbon steel and stainless steel
- Seals in PTFE, VITON, Buna N
- Working pressure: <50 barg
- Flange connection allows to change the product seal without dismantling the complete swivel joint.
- Hardened and polished ball race
- Lubrication via greasing nipples
- Internal heating to the heart of the swivel joint.
