

## 4-2ST Swivel Joint

### General description:

The model 4-2ST swivel joint is similar to the 3-2ST model, only it has a flanged connection instead of welding ends to facilitate the replacement of the product seals or other parts.

### Features:

- Available in carbon steel, stainless steel and aluminium (upon request)
- Seals in PTFE, VITON, Buna N
- Working pressure: <50 barg
- Flanged connection at both sides allows to remove the middle body easily
- Hardened and polished ball race
- Lubrication via greasing nipples
